to store, manage and archive media content

Big Easy One

Standard Package Features

Big Easy One Software – End to End Media Management

Big Easy One is a media management platform that was designed to meet the specialist requirements of:

- Media libraries
- Video/media production companies
- TV companies
- Individual videographers
- Corporate businesses

Big Easy One Software has a number of powerful tools that can help you to:

- ✓ Automate routine work and save time
- ✓ Fast upload and easily manage your media assets
- ✓ Setup the library workflow according to your business requirements
- ✓ Instantly convert media assets into different formats for system use
- ✓ Store media assets safely in the cloud
- ✓ Prepare your media content for sale within minutes
- ✓ Optimize and promote your media library
- ✓ Ensure fast and efficient work of your library for all the users
- ✓ Control all the changes that editors and admins perform

Multiple features managed through a simple interface ensures rapid throughput. We designed the system to be flexible enough for you to customize the library according to your needs right from the admin area. Check [Big Easy One software features](#).

Big Easy One Platform Security

Big Easy One media library software ensures highest level of security due to high coding standards, and extensive testing.

- ✓ Protection from sql injection by using prepared statements provided with the help of PDO means.
- ✓ Forms that change the data and requests, contain protection from cross site request forgery (CSRF).
- ✓ Protection from Brute force attacks
- ✓ Protection from Timing attack.
- ✓ The system uses the latest version of PHP/Laravel.
- ✓ XSS protection.
- ✓ Inquire about our IT Security & Governance policy.

Hosting & Support

When choosing a hosting provider the main goal is a fast, robust server to ensure excellent media library performance.

With a decade of experience in media library development we came to the conclusion that Amazon Cloud Hosting is best in class. Our media platform now has predefined types of media storage configuration ready to go.

For storage we offer the exact same charge rates as AWS. For support, AWS charge from \$150 per month plus 7% to 12% of storage cost. We charge from \$250 per month plus 7% of storage cost. Our price includes support of AWS servers and the Big Easy One media platform. For more information visit [Hosting & Support](#).

Media Upload Optimization Tools Integration

To speed up the process of media upload and transcoding we can integrate Aspera or Catapult software into our system.

Aspera is the creator of big-data WAN optimization s/w solutions that move the world's digital assets at maximum speed, regardless of file size, transfer distance and network conditions.

Catapult is an alternative solution for Aspera that is equally effective and allows you to reduce the media files transfer time.

Pricing

\$449

SAAS, monthly

Set up \$3,500

AWS Hosting & Support
from \$250 per month

Standard Package

Features Included

Transcoding	Advanced Search
